

Xinglan Ticket Platform Product Handbook v3.2

Ticket Hub: ticket creation, assignment, merge, close. Standard enabled.

Flow Desk: SLA timer, auto escalation, reminders. Professional enabled.

Insight Lens: reports and knowledge hit rate. Enterprise enabled.

Guard Center: permission, audit, field masking. Enterprise enabled.

P0 first response target: 15 minutes. P1 first response target: 30 minutes.

Customer-visible notes are external; internal handling notes are visible to agents, supervisors, auditors.

Since v3.2, knowledge hit rate = accepted answers / tickets that triggered knowledge recommendation.

In v3.1 and earlier, the old hit-rate formula is deprecated.

Queue means business assignment group, not message queue. Escalation means SLA escalation, not software upgrade.
