

Xinglan FAQ and Troubleshooting v3.2

E-SLA-409: SLA pause request conflicts with an active escalation task. Cancel the escalation task first, then resubmit approval.

E-AUTH-403: Current user lacks queue permission or field-level permission. Check role, queue membership, and masking permissions.

E-KB-204: Knowledge recommendation returned no candidate. Check whether the knowledge base is enabled for the queue.

If API health check fails on 8090, verify STARLAN_DB_URL and PostgreSQL connectivity.

If internal health check fails on 19090 but API 8090 is normal, check task scheduler and worker registration.

When P0 SLA pause exceeds 4 hours, both Supervisor and Auditor confirmation are required.

No document states that Xinglan supports WeChat Pay invoice issuing. Answers should refuse this unsupported claim.

Auto escalation in Flow Desk is unrelated to software upgrade rollback.
